

Horticulture and Floriculture are viewed as high growth industries in India. The Agro Division was set up with an intention to promote integrated development in horticulture and floriculture. The group yields a rich collection of varied ornamental crops, which consist of both indigenous and exotic vegetables and flowers. Most of which are exported across the world.

Horticulture:

The Group owns over 80 hectares of agriculture land. This is used for plantation of exotic vegetables like ginger and English vegetable. Spread over 25 hectares, it also produces table grapes.

Floriculture:

Our Green Houses are spread over 55 hectares of land. These are used for the plantation of exotic flowers like Gerbera, Roses, Carnation, Lillium, Gypsophila, Chrysanthemum, Gladiolus, Tube Rose, Bird of Paradise, Heliconia Foliage etc. Most of which are exported to Japan, Holland, Greece, Australia, UAE etc. These Green Houses have a production capacity of over 2,50,000 (approx) exotic flowers per day. With further expansions, we plan to be one of the largest growers globally.

Our Agro Division has acquired the most coveted Global Gap, SEDEX, ISO 9001:2000 and MPS GAP Accreditations.

Vision:

To become a leading enterprise, consistently delivering customer delight by focusing on value added diversified industries.

Mission:

To create and maintain a challenging and competitive culture in the group. Our performance-driven culture and responsible approach are the foundations of our success.

To build enduring relationships with customers, suppliers, employees and peer groups by leveraging the very latest technology and providing high quality products and services, thereby creating a productive work culture while ensuring the betterment of society and the preservation of the environment.

Culture:

Our performance-driven culture and responsible approach are the foundations of our success. We Encourage our employees to focus on achievement through passion and innovation.
